

MT9083 Series ACCESS Master Fiber Visualizer Enhancements

Enhanced PON Network Analysis

*This features available firmware version 1.20 or later

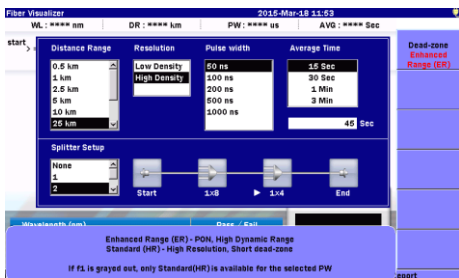

MT9083x2
ACCESS Master™
Fiber Visualizer

“Fiber Visualizer” is a fault location function designed to simplify the entire testing process. Fiber Visualizer automatically selects the testing parameters to ensure the correct setup and provides a simple, graphical summary of the fiber under test within seconds. Recent enhancements provide better event detection and accuracy as well as individualized PASS/FAIL analysis to simplify your FTTx/PON testing.

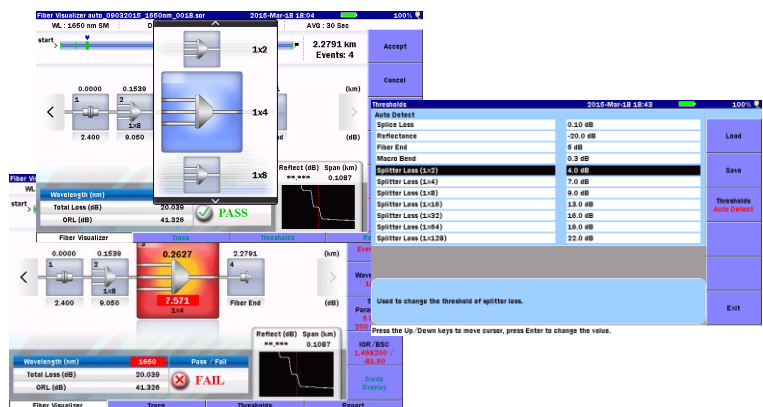

Feature 1

Enhanced Detection and Identification of PON Splitters and Fiber End Events

Feature 2

Customizable Pass/Fail Analysis for PON Splitters Based on Size

Feature 3

Multi-Pulse Width Testing Provides Full Details of Fiber Events Including PON Splitters
