- General Knowledge

COMPREHENSIVE INSTRUCTION OF ANRITSU INSPECTION SYSTEMS

Anritsu offers machine-specific **Championship Training** for all relevant customer personnel, including operators, food safety & quality (FSQA), and maintenance. Training focuses on gaining a deeper understanding of product changeovers, setup & adjustment, testing, proper cleaning, servicing and preventive maintenance.

Training is hosted in an open format, allowing participants to address specific concerns, and gain comfort in using all aspects of Anritsu inspection equipment.

Sessions are split into the following formats:

- **Classroom:** In-depth review of educational materials, manuals and drawings (as needed)
- **Hands-On:** Performed on the equipment to become fully proficient in all required functions

Training sessions are conducted either **on-site** at your facility, or **off-site** at our Elk Grove Village, IL headquarters (10 minutes from O'Hare Airport). Off-site attendees will have lunch provided, tour the Anritsu facility, and meet our Service & Support team.

Training materials will be provided to attendees.

Please allow at least four weeks notice for scheduling.

- Machine theory
- Machine safety
- Detection capabilities
- E-stops
- Error notification
- Start-up/shut-down
- System overview
- System cleaning

OPERATION

- Product changeover
- Clearing jams
- Clearing errors
- Reject timing
- Statistics/machine info
- Tips & tricks

QUALITY

- Product setup
- Adjusting sensitivity
- HACCP testing
- Reject verification
- Copying/deleting products
- Data management
- Product effect monitors
- USB saving parameters
- Reject logs

MAINTENANCE

- System wiring/diagrams
- Safety circuit
- Replacing consumables
- Weekly/monthly/yearly service items
- Internal status monitors
- Error logs
- Troubleshooting

ON-SITE INSTRUCTOR LED CLASSES

Championship Training at your facility

- Class size is recommended for up to six participants for optimal learning.
- Conference room or training area is recommended to allow detailed review of wiring diagrams & support group communication.
- Downtime or having the system offline is required for hands-on equipment training.
- All general curriculum items are covered, while in-depth training is focused on specific group needs.
- Minimum 4-week advanced scheduling preferred.
- Travel expenses & overtime/weekend/holiday rates are extra.

\$1,500/day, M-F

During normal business hours
Plus instructor travel expenses

OFF-SITE INSTRUCTOR LED CLASSES

Championship Training at Anritsu (Elk Grove Village, IL)

- Class size is recommended for up to six participants for optimal learning.
- Training is preferred with customer's actual equipment prior to shipment from Elk Grove Village to customer facility. Please coordinate training accordingly.
- Ideally, customer will ship or bring actual product(s) for training.
- All general curriculum items are covered, while in-depth training is focused on specific group needs.
- Customer responsible for travel to Elk Grove Village, IL and associated expenses.
- Minimum 4-week advanced scheduling preferred.

\$1,500/day, M-F

During normal business hours

This training is part of **Performance360** by Anritsu

The Anritsu Performance360 program provides comprehensive service, support and training, including:

- 24/7 technical support
- Remote support
- Preventative maintenance
- HACCP performance
