

Powerful Storage Area Networking (SAN) Testing

MT1000A
Network Master Pro

Many operators need to support Fibre Channel links in Storage Area Networks (SAN) together with other transport technologies like OTN, Ethernet, CPRI/OBSAI and SDH/SONET. Having one tool for all technologies is important for efficient testing. The multi-protocol Network Master Pro MT1000A with Fibre Channel option is the perfect tool for deploying Fibre Channel with support for testing links at rates of 1, 2, 4, 8 and 10 Gbps, and it also supports other technologies like OTN, Ethernet, CPRI/OBSAI, SDH/SONET and PDH/DSn. The all-in-one MT1000A gives the user less equipment to maintain and learn, helping reduce operating expenses.

The compact, battery-powered and easy-to-use Anritsu MT1000A with 10G Multirate Module MU100010A has everything in a single, handy tester needed to install and maintain communication networks from 1.5 Mbps to 10 Gbps. This portable, compact, lightweight instrument makes network field testing easy. Service engineers can read and interpret data from the tested network directly on the 9-inch color display with easy-to-understand indications and graphical symbols. And the GUI makes it simple to configure and operate the instrument at its full potential. The MT1000A has been designed for easy expandability, reducing initial costs, and facilitating step-by-step customized investment.

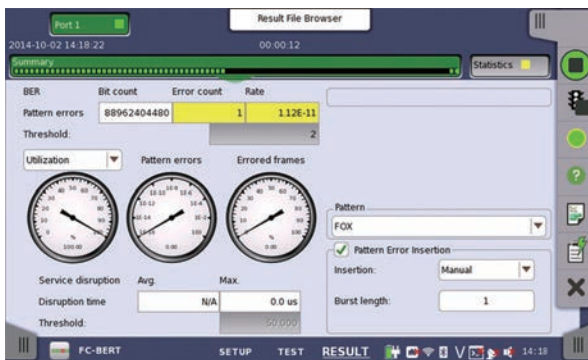

Key Platform Benefits and Features:

- All-in-one transport tester
 - Supports testing from 1.5 Mbps to 10 Gbps
 - OTN, Ethernet, CPRI/OBSAI, Fibre Channel, SDH/SONET and PDH/DSn
- OTN testing with Ethernet, CPRI, Fibre Channel, SDH/SONET client signals
- Easy and intuitive GUI
- Dual port at all rates
- WLAN*/Bluetooth*/LAN connectivity
- PDF, CSV and XML report generation for documenting test results
- Remote operation (VNC, Dedicated GUI software)
- Remote control (scripting, via Ethernet, WLAN, GPIB)
- Portable design for maximum portability
- Modular platform ensuring maximum return on investment

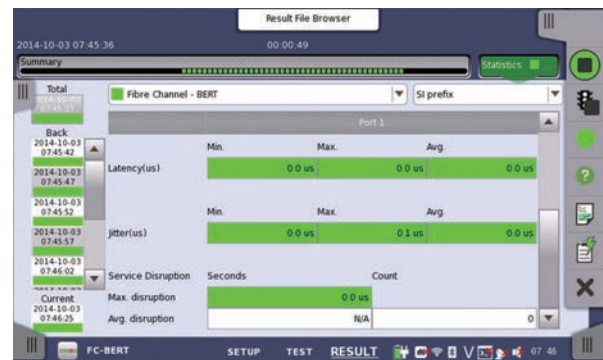

Key Fibre Channel Benefits and Features:

- 1GFC, 2GFC, 4GFC, 8GFC, and 10GFC tests
- Optional mapping to OTN
- Latency measurement
- BER tests including service disruption measurement
- Line alarm and error monitor
- Normal or Reflector mode

*: Available for certified countries and regions including USA, Canada, Japan and all EU countries.

Color indications give an easy overview of GO/NO-GO results

Powerful statistics include latency, packet jitter and service disruption information
