

Fiber Visualizer

New feature offering easy graphical summary & PDF reporting

MT9083x2

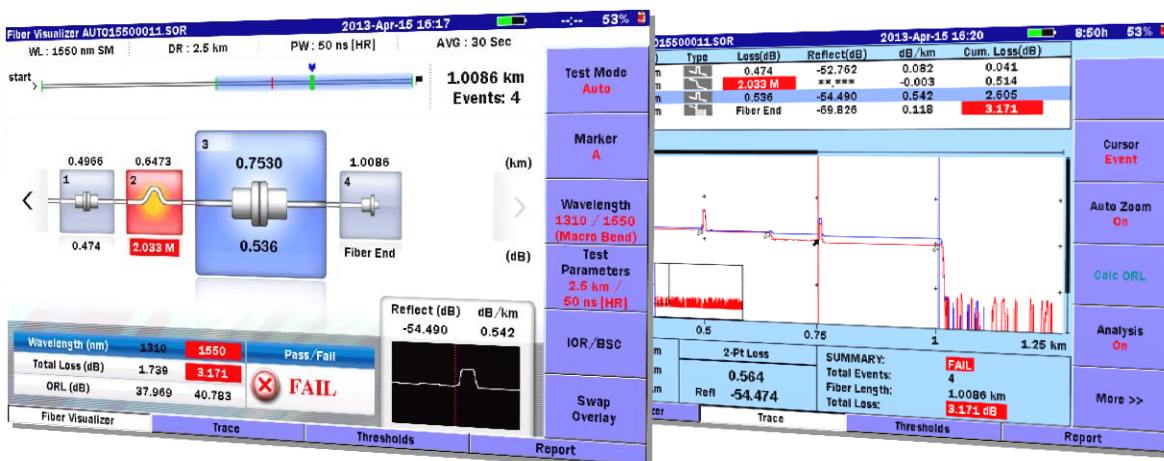

ACCESS Master™

“Fiber Visualizer” is a new fault location function designed to simplify the entire testing process. Fiber Visualizer automatically selects the testing parameters to ensure the correct setup and provides a simple graphical summary of the fiber under test within seconds. A comprehensive PDF report can then be customized and generated, completing the testing process.

- 7-inch widescreen TFT-LCD display
- Ready to test in only 15 seconds
- Long 12 hour battery life
- High resolution and high dynamic range
- Test up to four wavelengths with a single unit

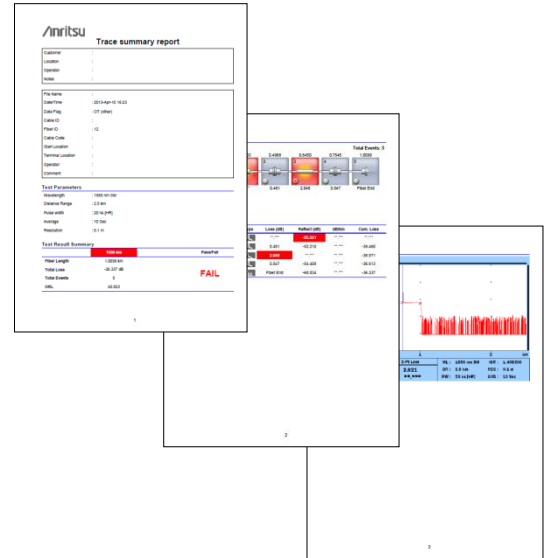

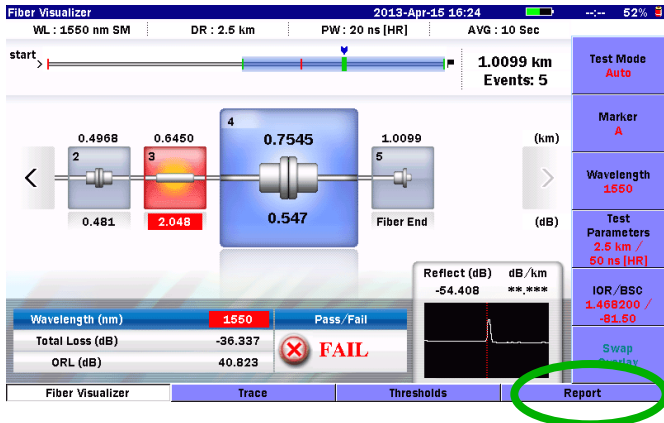

Easy to understand graphical summary

- ✓ Faults event and summary are displayed in a self explanatory graphical image.
- ✓ The selected event is able to be displayed on the lower right of the display.
- ✓ Toggle between summary and trace with a single button.

Simple PDF report generation

- ✓ One button PDF report generation from the Fiber Visualizer display.
- ✓ Report items are user selectable and display your own company logo.

Automatic Pass/Fail connector analysis

- ✓ IEC 61300-3-35 based connector Pass/Fail and PDF report generation.
- ✓ One button PDF report generation from the Connector surface Test Result display.
