

# Anritsu at a Glance

## Revenue/Operating Profit (Loss)

### Test and Measurement

## Sectors and Solutions

### Mobile Market

- R&D related to mobile telecommunications standards, such as LTE, LTE-Advanced, etc.
- R&D related to telecommunications chipsets (communications semiconductors incorporated in smartphones, etc.)
- R&D and manufacturing of such mobile communications terminals as smartphones and tablets

### Network Infrastructure Market

- R&D related to optical/digital telecommunications
- R&D and manufacturing of telecom equipment
- Construction/maintenance of optical fiber telecom networks
- Construction/maintenance of wireless base stations
- Network quality assurance (failure monitoring)

### Electronics Market

- General-purpose measurement for a wide array of fields
- R&D and manufacturing of telecommunications-related electronic components
- R&D and manufacturing of telecommunications equipment
- R&D and manufacturing of wireless base stations
- R&D and manufacturing of products related to digital household appliances and car electronics, etc.

## Main Customers

- Smartphone/tablet manufacturers
- EMS (electronics manufacturing service)
- Chipset manufacturers
- IT-related service providers
- Telecom operators

- Telecom operators
- Telecom network construction companies
- Telecom equipment manufacturers

- Electronic device/component manufacturers
- Telecommunications equipment manufacturers
- Mobile handset manufacturers
- Electronic equipment manufacturers

### Industrial Automation

### Contaminant Detectors

- Contaminant detection and shape inspection

### Weighers, Checkweighers

- Weighing, checkweighing, and package inspection

- Food producers (agricultural products, meat processing, processed foods)
- Pharmaceuticals/Cosmetics makers (pills, capsules, liquids, patches)

### Others

### Information and Communications

- Monitoring and control systems related to such public infrastructure as rivers, water supply facilities, etc.
- Bandwidth controllers for high-quality networks, such as those for financial systems, video distribution, etc.

- Public sector (central and local government units)
- Financial institutions
- Video distribution companies

### Devices

- Optical/ultra-high-speed devices for optical communications networks and telecommunications equipment

- Electrical equipment manufacturers
- Telecommunications equipment manufacturers

Notes: 1. Figures for Others include eliminations and corporate.

2. The classification of the precision measurement business was changed from Others to Industrial Automation from the fiscal year ended March 31, 2012.

3. Beginning the fiscal year ended March 31, 2013, the Information and Communications business is included in the Others segment, and has been retroactively included in this segment for the fiscal year ended March 31, 2012 figures.

4. Figures for the fiscal year ended March 31, 2012 and thereafter are based on IFRS.

# Responding to Society's Needs for Advanced and Innovative Telecommunications

Aiming for further advances in telecommunications systems that can be used anytime and anywhere

## Contribution of Anritsu as a top supplier in the mobile test and measurement field

Anritsu participated in the development of international standards for 3G mobile phones and became the first in the world to develop virtual base station simulators. With our base in technology we developed and our resulting customer base, we are contributing to the development research in next-generation LTE standards and LTE-Advanced systems.

Anritsu offers test and measurement solutions. These include the simultaneous testing of multiple terminals as well as wireless sending and receiving tests. They also include simultaneous measurement of multiple wireless devices with a single measuring device and support the development of higher-quality terminals and increases in productivity.

To respond to mobile needs in the construction and maintenance of networks, Anritsu became the first in the world to develop compact measuring devices. These contribute to repair work and expansion on mobile broadband networks, which are coming into wider use around the world.

## Anritsu Contributes to Comfortable Living
