Financial Results for the 1st quarter of the Fiscal Year ending March 31, 2021

Akifumi Kubota
Director
Executive Vice President
CFO
Anritsu Corporation
July 30th, 2020

(No notes here)
Cautionary Statement

All information contained in this release which pertains to the current plans, estimates, strategies and beliefs of Anritsu Corporation (hereafter "Anritsu") that is not historical fact shall be considered forward-looking statements of future business results or other forward-looking projections pertinent to the business of Anritsu. Implicit in reliance on these and all future projections is the unavoidable risk, caused by the existence of uncertainties about future events, that any and all suggested projections may not, come to pass. Forward-looking statements include but are not limited to those using words such as "believe", "expect", "plans", "strategy", "prospects", "forecast", "estimate", "project", "anticipate", "may" or "might" and words of similar meaning in connection with a discussion of future operations or financial performance.

Actual business results are the outcome of a number of unknown variables and may substantially differ from the figures projected herein.
Factors which may affect the actual business results include but are not limited to the economic situation in the geographic areas in which Anritsu conducts business, including but not limited to, Japan, Americas, Asia, and Europe, changes in actual demand for Anritsu products and services, increases or decreases in the competitive nature of markets in which Anritsu sells products or buys supplies, changing aptitudes at providing services, and exchange rates.

You also should not place reliance on any obligation of Anritsu to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Anritsu disclaims any such obligation.

The Group’s consolidated order intake increased by 7% year on year to 29.0 billion yen and revenue increased by 11% year on year to 25.7 billion yen. Operating profit increased by 90% year on year to 5.1 billion yen. Profit increased by 97% year on year to 3.5 billion yen. Comprehensive income is 3.7 billion yen.
In the T&M business, initial development demand for 5G as well as data center related demand were steady, and both revenue and profit increased year on year by 11% to 19.3 billion yen, and operating profit increased by 79% year on year to 4.9 billion yen (operating margin: 25.7%).

In the PQA business, needs for capital-investment towards automation and higher efficiency in the food market are strong, and both revenue and profit increased year on year by 8% to 4.4 billion yen, and operating profit increased by 0.3 billion yen to 0.1 billion yen (operating margin: 3.1%).
The operating profit and the operating margin for consolidated and each business segment for 1Q are as follows:

- **Consolidated**: 5.1 billion yen (Operating margin: 19.9%)
- **T&M**: 4.9 billion yen (Operating margin: 25.7%)
- **PQA**: 0.1 billion yen (Operating margin: 3.1%)

T&M: Test & Measurement   PQA: Products Quality Assurance

(No notes here)
In the first quarter, order intake of the T&M Business increased year on year by 2.2 billion yen (11.6%) to 22.0 billion yen, mainly by absorbing delayed order intake originally expected in the previous quarter, and also thanks to strong performance in capturing demand for 5G commercialization as well as demand related to data centers.

In the first quarter, due to some effect by COVID-19, the order intake of the PQA business decreased year on year by 0.6 billion yen (11.9%) to 4.7 billion yen. The order backlog for the entire Group was 25.2 billion yen (1.6% year-on-year decrease) and 18.2 billion yen (0.5% year-on-year decrease) for the T&M business and 5.2 billion yen (9% year-on-year decrease) for the PQA business.
6. Transition of Revenue by region

Revenue rose year on year in Asia, backed by strong 5G demand

Note: Numbers are rounded off to the first decimal place in each column.

(No notes here)
The operating cash flow was inflow of 4.9 billion yen.

The investing cash flow was outflow of 1.1 billion yen.

As a result, the free cash flow amounted to an inflow of 3.8 billion yen.

The financial cash flow was outflow of 11.0 billion yen.

The main outflows were redemption of corporate bonds 8 billion yen and dividends paid of 2.7 billion yen (Dividend per share: Fiscal year end dividend: 20.0 yen).

Consequently, the balance of cash equivalents at the end of the period decreased by 7.2 billion yen from the beginning of the fiscal year to 40.5 billion yen.
The forecast for the full year results of FY2020 remains unchanged from the plan announced on April 27.

Uncertainty of the social and economic situation continues due to the spread of COVID-19. The forecast assumes that COVID-19 will be settled within the first half of the fiscal year. Consequently, the situation of the spread of the COVID-19 infection and the time of convergence could have additional impact on Anritsu Group's performance, including a further prolongation of the slump in economic activity. The Company will swiftly publish information when it is expected material impacts that should be disclosed.
IV. 5G Market trends and Anritsu Initiatives

Hirokazu Hamada
Representative Director, President,
Group CEO,
Anritsu Corporation

(No notes here)
The Group established COVID-19 Prevention Task Force at the end of January. When the state of emergency was declared in April, we reduced the number of people commuting to work by 80% and expanded remote work. Since the state of emergency was lifted, we have continued to carry out initiatives to reach a new state of normalcy while maintaining a certain level of remote work, including ensuring social distancing in conference rooms, elevators, cafeterias, and elsewhere, and thoroughly disinfecting workplaces as well as eliminating contact. Currently, we have achieved a 70% reduction in staff attendance at work by increasing the number of days of remote work by rotation.

While the future outlook remains uncertain, the Group will continue to strive to minimize the impact on its business by means such as optimizing the scope of remote work in accordance with the risk level, establishing and expanding IT infrastructure, and diversifying procurement.
## IV-2. Business conditions amid COVID-19

<table>
<thead>
<tr>
<th>Region</th>
<th>Status of Sales Activities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Japan</td>
<td>Just starting to see some restriction for customer visit due to concerns for the second wave of infection</td>
</tr>
<tr>
<td>Americas</td>
<td>Though economic activities have been restarted in some areas, there are some movements for restriction again. Limited sales activities such as remote promotion are taken place.</td>
</tr>
<tr>
<td>EMEA</td>
<td>Economic activities have been restarted. Sales activities have been restarted accordingly but still have much restriction for customer visits.</td>
</tr>
<tr>
<td>Asia &amp; Others</td>
<td>Business activities have almost returned to normal. However, there are certain areas such as India where we have not been able to resume sales activities.</td>
</tr>
</tbody>
</table>

(No notes here)
The impact of COVID-19 has led to a slowdown in economic activity in many countries.
The mobile measurement market is no exception: the rollout of 5G service is slowing down in many regions.
We expect that even in these regions, as the spread of COVID-19 levels off, the rollout of 5G service and network expansion will resume and then accelerate to make up for the slowdown.
We would like to showcase solutions for markets we are focusing on.
IV-5. Manufacturing Solution for 5G Sub 6GHz devices

Test instruments for mass production of 5G Sub-6GHz smartphones

MT8870A
Universal Wireless Test Set

- Features
  Simultaneous testing of multiple antennas and parallel testing of 4 devices significantly increase production efficiency.
  - Parallel testing of multiple radio technologies (Cellular/WLAN/BT/GNSS) embedded in a smartphone
  - Simultaneous testing of up to 4 smartphones

- Target Market
  - Smartphone manufacturing market, Connectivity/IoT manufacturing market

- Target Customers
  - Smartphone/mobile device vendors, EMS

(No notes here)
IV-6. Speeding Up Solutions for data centers

Portable measuring instrument supporting 400G Ethernet

New Product

MT1040A
Network Master Pro

Features
Verification speeding up Data Centers upgrades 100G Ethernet → 400G Ethernet

Target markets
- Communication networks and data centers

Target customers
- Telecom carriers, communication network installers, communication equipment maintainers, network device vendors

Data Centers

100GE → 400GE

(No notes here)
We would like to showcase solutions of the PQA Business.
KDS1004PSW: Metal detectors for pills and capsules
Metal detectors for pills, capsules, and tablets detect metal in pharmaceutical pills and capsules, as well as food in tablet form. We are aiming to enter the new pharmaceutical market with this device.
Quicca Pharma: Comprehensive quality control/control system for pharmaceuticals
The QUICCA comprehensive quality control management system is able to centrally manage measurement data logs and operation history of multiple inspection machines. This system is aimed at using IoT to improve quality and productivity. Quicca Pharma is a management system specialized for pharmaceutical production inspection lines.
