

Environmental Policy

Anritsu Corporation

January 4th, 2017

Environmental Principle

Anritsu strives to give due consideration to the environment in both the development and manufacture of our products. Through sincerity, harmony and enthusiasm we will endeavor to foster a prosperous society at one with nature.

Action Guideline

From our factories to our offices, all of us at Anritsu are highly ecology-conscious and deeply committed to making our products and services as green as they can possibly be. We create "eco-offices," "eco-factories," and "eco-products" based on the "eco-management" of our company and the "eco-mind" of every one of us.

- (1) Over the whole life cycle of a product, from design and development, to procurement, manufacturing, marketing, distribution, and usage by customers, through disposal, we conduct environmentally conscious business activities.
- (2) We have set up an organizational and operational structure to perform environmental management activities, and have established and maintain an environmental management system that we continuously improve.
- (3) We comply with legal and regulatory controls and make every effort to continuously improve the environmental performance to meet the requirements from stakeholders.
- (4) In order to contribute to the prevention of global warming and conservation of biological diversity, we promote energy saving, 3Rs (reduce, reuse, and recycle), and environmental pollution risk reduction in all of our offices and factories.
- (5) We provide eco-products by saving energy, saving resources, and reducing hazardous substances.
- (6) We cultivate eco-minds by providing appropriate environmental education and training.

Director of the Environment and Quality Promotion Department

Shinichi Toriumi,

General Manager of the Global Procurement Operation Division

Requests Regarding Environmental Management Related to Procured Goods

Currently, we have an environmental management system in conformity with ISO14001, and are promoting activities with an eye to minimize the environmental impact across all fields of our business activities. In order to respond to the expanding worldwide trend, notably in Europe, of tightening regulations on hazardous chemical substances in products, we are pressing ahead to establish a system to control and assure the hazardous chemical substances in products.

In light of this, we would like all our trading partners engaged in supplying merchandise to us to understand the purpose of this and take due account of matters set out below.

In addition, we also request that you pass on this document to relevant manufacturers.

1. In accordance with our environment policy, we are promoting environmental management and would greatly appreciate your cooperation.

2. List of individual requests concerning environmental management

In accordance with our Green Procurement Guidelines, we request that you promote the following actions.

(1) Do not use substances and compounds eliminated by Anritsu, domestic and foreign laws in the products we procure, and do not use these substances or compounds in manufacturing.

(2) Reduce and control the waste generation.

In respect of packaging of procured products, promote activities such as choosing materials which are simple, light and less harmful to the environment and collecting packaging materials from us.

(3) Promote the use of recyclable resources and pay attention to recycling at all times, for example, by choosing materials that are easily recyclable, developing products that are easy to disassemble and degrade and indicating the materials used.

(4) Promote activities to conserve energy, such as conserving energy during

manufacturing process, and developing energy saving products.

(5) We will investigate the status of your function to control chemical substances in products as well as information on chemical substances used in the purchased products. We would appreciate your cooperation.

Notice of “Requests regarding Environmental Management”

Anritsu have an environmental management system in conformity with ISO14001 and are promoting environmental management activities across all fields of our business activities. In addition, in an effort to further promote environmentally friendly operations as a Group, since April 2003, domestic Anritsu Group companies have been operating under the unified environmental management structure. It is essential for us to issue “Requests regarding Environmental Management” to our trading partners, who are engaged in construction and delivery (in and out), handling and others of goods within our premises, and to gain cooperation.

Therefore, we would like to ask you to ensure that every one of your staff visiting our premises fully understands and observes the following matters.

◆ List of Requests regarding Environmental Management

We are pursuing improvement activities by setting up strict self-management standards, environmental objectives and goals, in addition to existing rules and regulations. We appreciate your cooperation and observance of these activities.

- (1) Reduce the use of paper and resources including packaging materials.
- (2) Dispose waste in accordance with the sorting rule for the waste to be recycled. Do not bring any waste other than that internally generated.
- (3) Do not dispose unauthorized chemicals, drinks, detergent or other liquid materials in the sink.
- (4) Prevent water and land contamination from spilling oil or chemical substances during delivery of goods and machine operation.
- (5) The diesel vehicles running within the Atsugi region must conform to the Automobile NOx/PM Act and ordinances of Kanagawa prefecture and the Metropolis of Tokyo. Drivers are recommended to avoid idling when the vehicle is stopped.
- (6) In energy consumption, introduce energy-saving equipment and save electricity when equipment is not in use.

- (7) In case where chemical substances leak accidentally within our premises, take measures to minimize impact on the environment and immediately report to the Environment and Quality Promotion Department of Anritsu Corporation for Atsugi region or Human Resource and Administration Department of Tohoku Anritsu Co., Ltd. for the Tohoku region and follow their instructions.
