Gigabit Ethernet Testing Redefined!

MT9090A with MU909060A1/A2/A3 Overview

The Ethernet technology is widely deployed, and used for carrier class Ethernet and Mobile backhaul. Therefore easy testing of Ethernet links is very important. When outfitted with the Gigabit Ethernet Module, the very compact battery-powered, easy-to-use Anritsu Network Master is a comprehensive solution for Gigabit Ethernet testing and for installation and troubleshooting Ethernet communication lines. The instrument gives the user facilities for easy bandwidth verification, connectivity testing and service availability verification. The small size and low weight of the instrument makes it very easy to carry around for the field technician working with the Ethernet lines and despite the small size the instrument is equipped with a large display. The user can easily read and interpret information from the tested lines off the large color display with easy-to-understand colors and graphical symbols. And the graphical user interface makes it a simple task to configure and operate the instrument.

Key Features

- RJ45 and SFP optical interface are selectable for two ports
- Newly released ITU-T standard for End to End Ethernet testing
 - ITU-T Y.1564 testing, simultaneously testing of multiple traffic streams emulating real world networks
- Stacked VLAN (Q-in-Q), MPLS, IPv4, IPv6 supported
- Test Automator simplify operation and ensure proper set-up
- Ping, Traceroute, Ramp data generation, RFC 2544 testing
- · Upstream/Downstream individual and simultaneous testing with end-to-end RFC 2544
- · Service Disruption Time measurement for VoIP and IPTV
- Shorter testing time of multiple port networks by utilizing MT9090 ports
- Optical power level check and electrical cable test for physical layer testing
- · In-band pass through and bidirectional monitoring using two ports
- Channel Stats for identifying error streams, top talkers, network attacks
- PDF and CSV report generation for documentation of test results
- Modular platform ensures maximum return on investment
- Compact and lightweight design for maximum portability in the field

Designed for Field Operations

The Network Master Gigabit Ethernet tester (MT9090A with MU909060A) is purpose built for testing Ethernet links in the field. Its hardware and user interface are optimized for simplicity, making it easy to use for any skill level, and it is rugged enough to function in harsh environments.

Quick Startup

The MU909060A is ready for measurement in about 15 seconds so productive work can start immediately.

Long Battery Life

Since AC power is not always available where you need it, the MU909060A provides up to 3 hours of testing on a single charge, depending on configuration and setup. This coupled with an optional car cigarette lighter cord guarantees the instrument is ready when you are.

Portable

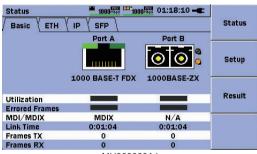

With its lightweight design and user friendly dimensions, the MU909060A is perfect for the outside plant environment and can easily be managed with one hand. The standard softcase with shoulder strap further increases portability when traveling from the truck to the testing site.

Rugged

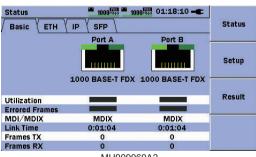

With no fans or vents to allow dust and moisture to enter the unit, the MU909060A was designed for the challenging outside plant environment. The protector included as standard equipment absorbs the shock to the tester.

4.3-inch Wide Screen Display for Easy Viewing

The high resolution, full color, 4.3-inch wide screen display is the perfect format for viewing Ethernet measurement results. It also provides excellent readability both indoors and outdoors.

No Experience Required

The expertise is built into the MU909060A. With its Test Automator and PASS/FAIL indicators the instrument makes it easy to test and troubleshoot Ethernet connections.

MU909060A1

MU909060A2

MU909060A3

- 1 4.3-inch high resolution, Indoor/Outdoor color display
- 2 Dedicated function keys for performing tasks
- 3 Start key for fast testing
- 4 Arrow keys for cursor movement and menu navigation
- 5 Set to Select/Accept
- 6 Menu key for easy access to set-ups and mass storage
- Ethernet test port A
- 8 Ethernet test port B
- (9) USB port for connecting to PC Type B (mini USB)
- USB port for connecting to thumb drive and USB-Ethernet converter Type A

Designed for Network Activation

For installation, commissioning and QoS verification the MU909060A provides powerful and flexible traffic generation capabilities, allowing you to easily test the network under various conditions, including generation of VLAN tagged traffic. The instrument also provides facilities for BER testing of the lines, performance statistics and QoS statistics.

Single end test with Loopback or Using a Ethernet Reflector, Two ports simultaneous testing for multiple ports installation.

Bidirectional performance test with End-to-End RFC 2544, Two ports simultaneous testing for multiple ports installation.

Installation and Maintenance Simplified

Since the MU909060A is purposely built for easy testing of Ethernet links in the field, its hardware and user interface are optimized for simplicity. The instrument is easy to setup using its keys and screen. The user can also store setups relevant for a given application and via a USB port distribute the setup to other instruments with the Gigabit Ethernet module. A Test Automator is provided making it easy to set up a sequence of tests.

The Test Automator makes it easy to set up a sequence of tests

Report Generation

With the powerful and flexible report generator you can create .pdf or .csv files for selected measurement results. With these files you can provide professional documentation of test results to your customers.

PASS/FAIL indication, Graphical Display

The result can be checked not only value but also PASS/FAIL indicator and Graphical Display

Y.1564 Test Option

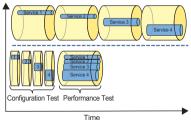

ITU-T Y.1564 is a new test methodology for bring Ethernet networks into service, simultaneously completing multiple traffic streams. RFC 2544 commonly use today completes tests in a serial manner never running all traffic streams at the same time. ITU-T Y.1564 completes this testing in two phases:

- Service Configuration Test, confirms the end to end configuration while quickly checking the Information Rate (IR), Frame Delay Variation (FDV), Frame Loss Ratio (FLR), Frame Loss Ration at the Service Acceptance Criteria (FLRSAC), Committed Burst Size (CBS) and Excess Burst Size (EBS) sequentially for all configured traffic streams.
- Service Performance Test transmits all configured traffic streams simultaneously at the CIR confirming all traffic is able to transverse the network under full load while checking the following IR, FDV, FLR and Availability (AVAIL).

This two phase approach reduces total testing time.

RFC 2544 completes tests one after another

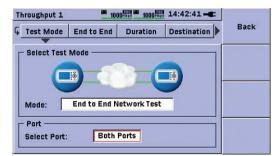

Y.1564 completes a quick per service test followed by the performance test

RFC 2544 Test Option

With the RFC 2544 test option, testing of throughput and frame loss, latency, packet jitter and burstability is straightforward. The MU909060A automates the testing procedure while still allowing you to configure the test to be as thorough as needed.

To get full information on the performance of both sides of a line, the end-to-end test mode allows two MU909060A to work together in an in-band control setup whereby the user can control both units and inspect the results of the test from both units on the master instrument.

Multistream Option

The Ethernet Multistream option for the MU909060A allows testing a congested networks ability to transport high priority traffic rather than lower priority traffic. The user can activate up to 8 streams with different priority settings on the Ethernet line and detect how they are affected by frame loss through the network.

Simplifying Maintenance and Troubleshooting

The MU909060A has maintenance and troubleshooting application in 800 g pocketable package.

Pass through monitoring by inserting the tester in a network. Tx and Rx of two ports are used for this application.

Bidirectional monitoring by dividing both signals and put them into the tester. Two Rxs are used for this application.

Channel Stats (Option)

Up to 63 streams can be selected by the filter of Source/Destination addresses, VLAN, MPLS. Those streams can be monitored and displayed in detailed information. It's useful to identify the error streams, top talkers and network attack.

Simultaneous Two Ports Monitoring

MU909060A has two ports and they can be used simultaneously. It saves the test time for multiple ports deployment. It is possible to support identification of issues in the network by pass through monitoring and bidirectional monitoring.

Remote GUI Option

MU909060A can be operated remotely from the far end operation center using a Web browser. USB-Ethernet Converter (option) connects the MU909060A with Ethernet for remote control.

*1: Correct functioning can only be guaranteed with optical modules from Anritsu for the MU909060A. Modules with extended temperature range (up to +85°C) must be used.
 *2: Excludes deviations caused by conformance to Laser Notice No. 50 dated June 24, 2007
 *3: Safety measures for laser products

This product complies with optical safety standards in 21CFR1040.10 and IEC 60825-1; the following descriptive labels are affixed to the product.

Ordering Information

Please specify the model/order number, name and quantity when ordering.

The names listed in the chart below are Order Names. The actual name of the item may differ from the Order Name.

1) Select Mainframe

Model/Order No.	Description	
MT9090A	Mainframe (with color LCD)	
Standard accessories		
G0203A	AC Adapter	
G0202A	NiMH Battery Pack	
Z1023A	Strap	
B0601B	Standard Soft Case	
B0663A*1	Protector	

2) Select Base Model*2

Model/Order No.	Description	
MU909060A1	Gigabit Ethernet Module (with one SFP slot and one RJ-45 port)	
MU909060A2	Gigabit Ethernet Module (with two RJ-45 ports)	
MU909060A3	Gigabit Ethernet Module (with two SFP slots)	
Standard accessories		
W3173AE	Gigabit Ethernet Tester Quick Start Guide	
Z1234A	Network Master Gigabit Ethernet Tester CD	

3) Select Module Option

One module can be installed in MU909060A1. Two modules can be installed in MU909060A3

Model/Order No.	Description
G0240A	1000 Mbps SX SFP
	[850 nm multimode, LC connector (optical)]
G0241A	1000 Mbps LX SFP
G024TA	[1310 nm single mode, LC connector (optical)]
G0242A	1000 Mbps ZX SFP
GUZ4ZA	[1550 nm single mode, LC connector (optical)]
C0242A	100 Mbps FX SFP
G0243A	[1310 nm multimode, LC connector (optical)]
000444	100 Mbps LX SFP
G0244A	[1310 nm single mode, LC connector (optical)]
G0246A	10/100/1000 Mbps RJ-45 SFP (electrical)

4) Select Software Option

/	•
Model/Order No.	Description
MU909060A1-001	RFC 2544 Test (for MU909060A1)
MU909060A2-001	RFC 2544 Test (for MU909060A2)
MU909060A3-001	RFC 2544 Test (for MU909060A3)
MU909060A1-002	Multistream (for MU909060A1)
MU909060A2-002	Multistream (for MU909060A2)
MU909060A3-002	Multistream (for MU909060A3)
MU909060A1-003	Stacked VLAN (for MU909060A1)
MU909060A2-003	Stacked VLAN (for MU909060A2)
MU909060A3-003	Stacked VLAN (for MU909060A3)
MU909060A1-004	MPLS (for MU909060A1)
MU909060A2-004	MPLS (for MU909060A2)
MU909060A3-004	MPLS (for MU909060A3)
MU909060A1-005*3	Remote GUI (for MU909060A1)
MU909060A2-005*3	Remote GUI (for MU909060A2)
MU909060A3-005*3	Remote GUI (for MU909060A3)
MU909060A1-006	Channel Stats (for MU909060A1)
MU909060A2-006	Channel Stats (for MU909060A2)
MU909060A3-006	Channel Stats (for MU909060A3)
MU909060A1-007	Y.1564 Test (for MU909060A1)
MU909060A2-007	Y.1564 Test (for MU909060A2)
MU909060A3-007	Y.1564 Test (for MU909060A3)

5) Select Accessories

Must be added as separate line items

Model/Order No.	Description
Z1580A*4	Protector & Soft Case
B0600B	Hard Case
B0602B	Deluxe Soft Case (for MT9090A)
J1402A	Car Plug Cord
W3166AE	MU909060A1/A2/A3 Operation Manual (Hardcopy – English version)
J1480A*5	USB-Ethernet Converter

*1: The shoulder strap can be used to hang the instrument around the neck while working.

- *2: Not support MT9090A with MT9090A-001.
- *3: Requires J1480A USB-Ethernet Converter (sold separately)
- *4: The protector (B0663A) and standard soft case (B0601B) from a set. The protector includes a shoulder strap.
- *5: Requires MU909060Ax-y05 Remote GUI (sold separately)

6) Warranty Service

Description
2 Years Extended Warranty Service (for MT9090A)
3 Years Extended Warranty Service (for MT9090A)
2 Years Extended Warranty Service (for MU909060A1)
2 Years Extended Warranty Service (for MU909060A2)
2 Years Extended Warranty Service (for MU909060A3)
3 Years Extended Warranty Service (for MU909060A1)
3 Years Extended Warranty Service (for MU909060A2)
3 Years Extended Warranty Service (for MU909060A3)

7) Installed Software Option (Retrofit)

The following software options can be field installed by the customer in already purchased Network Master Gigabit Ethernet testers.

Model/Order No. Description MU909060A1-301 RFC 2544 Test Retrofit (for MU909060A1) MU909060A2-301 RFC 2544 Test Retrofit (for MU909060A2) MU909060A3-301 RFC 2544 Test Retrofit (for MU909060A2) MU909060A1-302 Multistream Retrofit (for MU909060A1) MU909060A2-302 Multistream Retrofit (for MU909060A2) MU909060A3-302 Multistream Retrofit (for MU909060A2) MU909060A3-302 Multistream Retrofit (for MU909060A2) MU909060A3-303 Stacked VLAN Retrofit (for MU909060A1) MU909060A3-303 Stacked VLAN Retrofit (for MU909060A2) MU909060A1-304 MPLS Retrofit (for MU909060A1) MU909060A3-304 MPLS Retrofit (for MU909060A1) MU909060A3-305*3 Remote GUI Retrofit (for MU909060A2) MU909060A1-305*3 Remote GUI Retrofit (for MU909060A2) MU909060A1-306 Channel Stats Retrofit (for MU909060A1) MU909060A1-306 Channel Stats Retrofit (for MU909060A2) MU909060A3-306 Channel Stats Retrofit (for MU909060A2) MU909060A1-307 Y.1564 Test Retrofit (for MU909060A2) MU909060A3-307 Y.1564 Test Retrofit (for MU909060A2)	aneady purchased is	ietwork master Gigabit Litternet testers.

B0601B Standard Soft Case This standard accessory accommodates the mainframe with fitted protector.

B0602B Deluxe Soft Case Full Network Master operation without removal from the case. Provides excellent protection for use in hash conditions. This does not accommodate the mainframe if the protector is fitted.

B0600B Hard Case

This accommodates two mainframes (with or without fitted protector), accessories (light source or power meter, backup battery, fiber cleaner, etc.).

8

B0663A Protector (Standard accessory)

MT9090 Series Metwork Master

MU909014/15 µOTDR

Compact OTDR for full automatic verification of optical networks, FTTH-PON, Metro and Core.

ACCESS Master MT9085 Series

For WAN/MFH/DCI/FTTH Optical Fiber I&M

- · Improved operability with powerful synergy of 8-inch touchscreen and hardware keys
- · At-a-glance Pass/Fail evaluation using Fiber Visualizer
- All OTDR, OLTS, and Visible Light Source operations on one screen
- Short event dead zone of ≤0.8 m and high dynamic range of 46 dB max.
- Power meter option for measuring optical power up to +30 dBm

MT1000A Network Master Pro Motore Network Master

MU100020A OTDR Module 1310/1550 nm SMF MU100021A OTDR Module 1310/1550/850/1300 nm SMF/MMF MU100022A OTDR Module 1310/1550/1625 nm SMF MU100023A OTDR Module 1310/1550/1650 nm SMF

Installing an OTDR Module MU100020A/MU100021A/MU100022A/MU100023A provides the OTDR functions required for optical fiber I&M. Work efficiency is increased by all-in-one support for optical fiber tests and data communications network commissioning. I&M tests of 1.5 Mbps to 100 Gbps communications networks can be executed by simultaneously installing the MU100010A or MU100011A. In addition to supporting Ethernet, OTN, etc., networks, Mobile base station CPRI and OBSAI, as well as SyncE protocols are also supported.

MU100010A 10G Multirate Module MU100011A 100G Multirate Module

Installing the MU100010A or MU100011A in the MT1000A supports commissioning and maintenance tests of communications networks operating at speeds from 1.5 Mbps to 100 Gbps. In addition to Ethernet, OTN, eCPRI/RoE/CPRI/OBSAI, Fibre Channel and SyncE protocols used by mobile-network base stations are supported too.
