

MX190000A/MX183000A β-Version Download Page Guides

~MP1900A My Anritsu Registration~

Signal Quality Analyzer-R MP1900A

This is an announcement for customers using the Signal Quality Analyzer-R MP1900A and High-Speed Serial Data Test Software MX183000A.

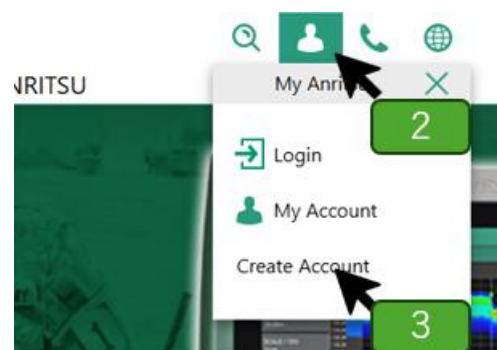

On December 24, 2025, the beta version software was made available for download through the My Anritsu service. This announcement was not about the beta version release itself, but rather to request that you complete the following registration as preparation for using the beta version.

- **My Anritsu User Registration**
- **MP1900A Product Registration**

Customers who have completed these registrations will be notified by email with details when the beta version software becomes available for download.

My Anritsu User Registration Method

1. Access Anritsu's official website at the following URL:
<https://www.anritsu.com>
2. Click the "person-shaped icon (My Anritsu)" in the top right corner of the screen.
3. Click "Create Account" from the displayed menu.
4. The "Anritsu ID Login" screen will appear, so please click the "Create Account" button.
The "Create Anritsu ID" screen will be displayed. Follow the on-screen instructions and enter the required information.
5. After entering the information, click [Next] and an email address confirmation page will appear. A confirmation code will be sent to your registered email address, so please enter the provided code in the email.
6. Account creation is complete after entering the code

Notes

- Free email addresses (e.g. @gmail.com, @yahoo.co.jp, etc.) cannot be registered for the beta version download page.
- Please use your company email address.
- The personal information you provide will be used solely for distributing beta version software and related information.

MP1900A Product Registration

After completing the My Anritsu user registration, proceed with product registration.

1. Access Anritsu's official website at the following URL: <https://www.anritsu.com>
2. Click the "person-shaped icon (My Anritsu)" in the top right corner of the screen.
3. Click "Login" from the displayed menu.
4. The "Anritsu ID Login" screen will appear, so enter your Email Address and Password, then click the [Login] button to log in.
5. After logging in, the "My Anritsu" page will be displayed. Select "Product Registration" from the top menu.
6. When the "Product Registration" screen appears, enter "MP1900A" in the product registration field and click the [Search Model Number] button.

Only one MP1900A unit needs to be registered; there is no requirement to register multiple units. Modules and other components do not need to be registered. The same serial number may be registered under multiple accounts. For customers who do not have an MP1900A, registration can be completed by entering "999."

7. By registering "MP1900A", you will be able to access both the official version download page "MP1900A - Signal Quality Analyzer-R" and the beta version download page "MP1900A - Beta software".
8. Enter the serial number of your MP1900A and click the [Add] button.
9. If the serial number matches, click the [Submit] button at the bottom right of the screen.
10. You will receive a confirmation email titled "Your Anritsu Product Registration Request Has Been Received - MP1900A". *Please note that registration is not yet complete at this point.
11. After we verify your request, you will receive a product registration completion email. This completes the registration process. Product registration may take several days to complete. If you need urgent assistance, please contact your local Anritsu sales representative.

β version Download Method

1. Access Anritsu's official website at the following URL: <https://www.anritsu.com>
2. After logging in, the "My Anritsu" page will be displayed. Select "Registered Products" from the top menu.
3. From the displayed product list, select "MP1900A - Beta Software".
4. The software license agreement will be displayed. Review the content and click [Agree].
5. The product support page will be displayed.
6. Click the [Product Information for Registered Users] tab, and the "Downloads" tab will appear.
7. Click "► MP1900A - Beta Software" to expand the list of available items for download.
8. Click the software name or release notes you wish to download to view revision details, precautions, and other information. After reviewing the content, click the [Download] button on the right side to begin downloading the selected file. Then install it in your product for use.
