

## Models That Require Registration Confirmation for Software Downloads

For the following models, export control laws require confirmation of your registration information prior to using Anritsu's software download service.

1. To begin registration for these models, [login here](#) to access the online Product Registration form.
  - Be sure to complete the form using your legal name and an accurate company name, address and email. Entering an abbreviated name, dummy data or a free email address (such as Gmail) may result in processing delays or declined registrations.
  - If you are not the owner of the product, the registration application may be declined.
2. Confirmation is usually completed within 5 business days for most registrations. Confirmation for products not purchased directly from Anritsu generally requires more time.
3. You will be able to download software after your registration information is confirmed.
