5. Advantages of Using MD8470A

Supplementary
Services

■ No Dependence on Real Network

Compared to testing using a real network, the MD8470A connection is more stable and the test results have high reproducibility so the test efficiency is good.

■ Able to Retrieve and Analyze Wireless and SS Protocols

- The wireless protocol and SS protocol logs can be saved during testing so problems can be analyzed easily.

■ Use Sample Scenarios

Since sample scenario source code(*) can be used when performing SS tests, test parameters and sequences for regular and irregular systems can be changed easily.

* The above W-CDMA/GSM Sample Scenarios are offered by web download service of MD8470A support service (MX847010A-20).
