

Instruction Sheet

MU100040B CPRI RF Module

READ THIS BEFORE INSTALLING THIS HARDWARE MODULE

The MU100040B CPRI RF Module requires software version 9.00 or later to be installed on the MT1000A Network Master Pro. Make sure the MT1000A is loaded with the proper software version before installing the MU100040B hardware module.

MT1000A Software Upgrade Instructions

If the software version on your MT1000A Network Master Pro is not V9.00 or later, update the software before installing the MU100040B module. To check the software version, press the  icon on the Instrument Toolbar to display the System Information screen.

You will need a USB memory device in FAT32 file system format.

1. Insert the memory device into your PC or laptop.
2. From a browser, go to the following Anritsu Products page:
<https://www.anritsu.com/en-us/test-measurement/products/mt1000a>
3. On the product page, press the Downloads button.
4. Under the Drivers/Firmware/Software tab, click on the link MT1000A_Software.
5. Click the Download button, then choose **Save As** to download the installer to the USB memory device. Do not run the installer directly from the Web page.
6. When the installer finishes downloading to the USB device, eject it from your computer.
7. Shut down the MT1000A, then unplug the power adapter and confirm the **Power** button is off. Do *not* force a shutdown by pressing and holding the **Power** button.
8. Insert the USB memory device into the instrument.
9. Connect the MT1000A to an AC power source, then press **Power** to turn it on.
The instrument will detect the installer and automatically start the software installation. After the installation has completed, the instrument will reboot.
10. Remove the USB device from the instrument.

For information on installing the MU100040B CPRI RF hardware module, refer to the MT1000A/MU100040A/MU100040B Operation Manual (document number 10580-00443).
