### MG3641A / MG3642A Synthesized Signal Generator

#### **Important Product Configuration Information**

The Anritsu Models MG3641A/3642A RF Synthesized Signal Generators (125 kHz to 1040/2080 MHz) have several options which can be ordered:

- Option 01: Reference Oscillator, aging rate =  $\pm 5 \times 10^{-10}$ /day
- Option 11: Pulse Modulator
- Option 21: AF Synthesizer (adds triangular, square and sawtooth waveforms to standard sinewave oscillator)
- Option 22: FSK Encoder
- Option 23: Pattern Generator

★ **This signal generator is limited to having only two of the Options 21, 22 and 23 installed simultaneously!!** ★

This limitation is not mentioned in either the catalog or the applicable product brochures. Options 01 and 11 may be installed simultaneously with any two of Options 21, 22 or 23. Also, these options must be installed at the factory and can not be added or changed by our service department. **Please be sure that your customers are aware of these facts when configuring their orders.**

Also available is the Software for Pattern Generator Data Write, Order No. MX364001B, which is used in conjunction with Option 23.

Future product literature will reflect these requirements.

Specifications are subject to change without notice.
