

**Anritsu Selected Official Network Monitoring Provider
by O2 Czech Republic**

Copenhagen, Denmark – March 2nd, 2016: Anritsu A/S, a global provider of Operations Support Systems (OSS) for advanced and converged networks, announced today that its MasterClaw™ Service Assurance system has been selected by O2 Czech Republic, the largest integrated telecommunications provider in the Czech market, to continue monitoring existing network elements including new VoLTE and IMS installations, as well as future expansions to their networks during the next 5 years.

Anritsu Service Assurance Solutions have monitored O2's network deployment through almost a decade of network evolutions. This solid partnership is the base of a new collaboration project for IMS and VoLTE between the two parties.

“Anritsu is very pleased about the continued partnership with O2 Czech Republic for the coming 5 years and for the trust placed in our Multi-Dimensional Assurance Solutions to support O2's daily activities and their goal of ensuring a superior customer experience for subscribers” said Mr. Neil Tomlinson, COO at Anritsu Service Assurance. “We take pride in the fact that O2 Czech recognises Anritsu's commitment to be at the forefront of technological evolutions, and providing the right business solutions to O2”.

“I believe that MasterClaw Service Assurance will significantly help us to fulfil our goals in further improving quality of services. With its advanced capabilities in both reactive and proactive network quality monitoring we can focus on providing even better services to all our subscribers” said Mr. Jakub Votava, Director of Networks at O2 Czech Republic a.s.

O2 Czech is recognized as a technological leader in the Czech market and early adopter of new technologies, offering their customers the latest features and functionalities available in the market while running an efficient and carefully maintained network.

#####

About O2 Czech Republic

O2 (<https://www.o2.cz/osobni/en/>) is the largest integrated telecommunications provider in the Czech market. At present we operate close to eight million mobile and fixed accesses, which ranks us among the market leaders in fully converged services in Europe. To users of mobile services in the Czech Republic we offer state-of-the-art HSPA+ and LTE technology. We have the most comprehensive proposition of voice and data services in the Czech Republic, and we actively exploit the growth potential of the various business lines, especially ICT. Our data centres, with total floor area of 7,300 square metres, rank us among the leaders in hosting, cloud and managed services. O2 data centres belong to the few commercial ones in Central Europe to have TIER III certification. With our O2 TV we are also the largest IPTV service provider in the Czech Republic.

About Anritsu

Anritsu Corporation (www.anritsu.com) has been a provider of innovative communications solutions for more than 120 years. The company's portfolio includes service assurance solutions and test and measurement solutions that address the technology lifecycle from "Birth to Profit" covering R&D and lab testing, to operational support systems for in-service network monitoring and service assurance. Anritsu's award winning service assurance solutions offer an integrated portfolio of applications combining network monitoring and optimization with a unique suite of service and business intelligence analytical solutions and enable the most critical customer experience needs of our customers. Anritsu is a market leader in the Service Assurance sector and fully supports both legacy and next-generation network technologies such as LTE, M2M, RCSe, IMS and VoIP. Anritsu sells in more than 90 countries worldwide with approximately 4,000 employees and annual turnover of approximately US \$1B.
