Mission Critical

Anritsu's solutions provide over-the-air analysis, spectrum monitoring, and coverage mapping of narrowband analog, digital, and FirstNet 5G/LTE data systems. Benchtop performance in a rugged handheld cable and antenna analyzer, swept and real-time spectrum analyzer, and interference analyzer — the ultimate field solutions for deploying and maintaining critical communication systems.

LMR Master™
S412E

The ultimate solution for installing and maintaining public safety system

Site Master™
MS2089A

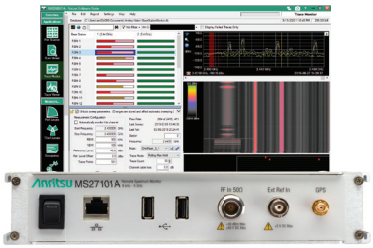
Seamless integration of cable and antenna analysis with spectrum analysis and remote monitoring

Field Master™
MS2080A

Cutting edge spectrum analysis and monitoring functionalities

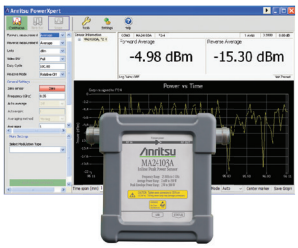
InterferenceHunter™
MA2700A

Handheld antenna with GPS and electronic compass enables superior interference hunting



Remote Spectrum Monitor
MS27101A

Advanced spectrum monitoring capabilities up to 54 GHz, IP67 rating, and up to 24 RF ports



Peak Power Sensor
MA24103A

Inline peak power measurements from 25 MHz to 1 GHz
